.Course Outline

Part A

1. **Course Code:** CSE 1105

2. **Course Title:** Computer Applications in Business

3. **Course Type:** Foundation Course

4. **Year:** First **Semester:** Second

5. **Academic Session:** 2024

6. **Course Teacher:**
Farjana Rahman Farin, Lecturer, Department of Computer Science and Engineering, Sonargaon University (SU).
e-mail: farjanafarin.su.cse@gmail.com, **mobile:** +8801631875742

7. **Pre-requisite:** N/A

8. **Credit:** 3.00

9. **Contact Hours:** 3.0 hrs. /week.

10. **Total Marks:** 100

11. **Rationale of the Course:**
As digitization is touching our lives in almost all spheres computers are inevitable. Computers are present everywhere from schools to colleges to banks to post offices to professional world to personal life. Education is fully dependent on the rigorous use of computers. Computer Fundamentals (CSE 1101) is one of the basic courses of CSE that helps the students to go deep into this magical machine. This course has been designed for newly admitted students with great enthusiasm to learn and apply their knowledge in the long run.

12. **Course Objective:**
The main objective of this course is to introduce the fundamentals of computing devices and reinforce computer vocabulary, particularly with respect to personal use of computer hardware and software, the Internet, networking, and mobile computing. It focuses on such computer literacy that prepares students for the life-long learning of computer concepts and skills. Students discover why computers are essential components in education, business, and society in this course.

13. Course Learning Outcomes (CLOs) and Mapping of CLOs with Program Learning Outcomes (PLOs):

Sl.	Course Learning Outcomes(CLO) (3-5)	PLO1	PLO2	PLO3	PLO4	PLO5
1.	Analyze the organization of a computer system.	✓				✓
2.	Describe different types input devices with their uses.	✓	✓		✓	✓
3.	Identify different types of output devices and sate their uses.	✓		✓		✓
4.	Evaluate the storage and processing system of a Computer System.	✓		✓	✓	✓
5.	Create proper Communication through a computer system.	✓	✓		✓	✓

Part B

14.
Course Plan Specifying Content, CLOs; Teaching Learning and Assessment Strategy mapped with CLOs.

Week	Topic	Teaching Learning Strategy	Assessment Strategy	Corresponding CLOs
1.	**Exploring Computers and Their Uses:** • The Computer definition • Computers for Individual User • Computers for Organizations • Computers in Society	Lecture, Visualization, Group Study	Asking Questions/Quiz	CLO-1
2.	**Looking Inside the Computer** • The parts of a Computer System. • The Information Processing Cycle. • Essential Computer Hardware • Software Brings The Machine to Life • Computer Data • Computer Users System	Lecture, Visualization, Group Study, Lab-Practical	Asking Questions/Quiz	CLO-1
3.	**Interacting with Personal Computer** • The standard keyboard layout • The mouse and the variant of the mouse • Ergonomics and input devices • Inputting data into other wise	Lecture, Visualization, Lab Practical	Assignment/ Research and Report	CLO-2
4.	**Computer Outputs** • Video and sound • Monitors • Ergonomics and monitors • Printers	Lecture, Visualization Lab-Practical Case Study	Class test	CLO-3

5.	**Transforming Data into Information** • How Computers represent Data • How Computers Process Data • Factors Affecting Processing Speed	Lecture, Visualization, Practices, Group Study	Quiz/ Asking students to summarize	CLO-4 CLO-5
6.	**Modern CPUs** • A Look Inside the Processor • Microcomputer Processors • RISC Processors • Parallel Processing • Extending The Processors Power to other devices	Lecture, Classroom, Practices, Case Study	Quiz/Case Study Evaluation	CLO-4
7.	**Storing Data** • Types of Storage Devices • Magnetic Storage devices • Optical Storage devices • Solid State Storage Devices	Lecture Inquiry Guided Instruction Lab-Practical	Quiz/Presentation	CLO-4
8.	**Measuring and Improving Drive Performance** • Average Access Time • Data Transfer Rate • Optimizing Disk Performance • Drive Interface Standards	Lecture, Visualization, Lab Practical Case Study	Case Study Evaluation	CLO-5
9.	**Operating Systems Basics** • Types of Operating Systems • Providing a User Interface • Running Programs • Managing Hardware • Enhancing an OS with Utility Software	Lecture, Visualization, Lab Practical	Quiz/Discussion Questions	CLO-5
10.	**Networking Basics** • The Users of a Network • Common Types of Networks • Hybrid Networks • How Networks Are Structured • Network Topologies and Protocols	Lecture, Visualization, Lab Practical Group Study	Assignment/ Research and Report	CLO-5

11.	**Presenting The Internet** • The Internet's Major Services • Understanding the World Wide Web • Using Your Browser and the World Wide Web • Searching the Web • Using E-mail	Lecture, Visualization, Lab Practical Case Study	Class test	CLO-5
12.	**Doing Business in the Online World** • E-Commerce at the Consumer level • E-Commerce at the Business level • Security	Lecture, Visualization, Group discussion, Lab Practical Group Study	One question Quiz/ Discussion Questions	CLO-5
13.	**Productivity Software** • Acquiring Software Word Processing • Programs, Spreadsheet Programs, Presentation Programs, Personal Information managers	Lecture, Visualization, Group discussion, Lab Practical Group Study	Group Presentation/ Research and report	CLO-5
14.	**Graphics and Multimedia** • Understanding Graphics file formats • Getting Images into your Computer • Graphics Software • Multimedia basics	Lecture, Visualization, Lab-Practical	Quiz/Discussion Question	CLO-5

Part C

15. Assessment Strategy:

Quizzes: Altogether 4 quizzes may be taken during the semester, 2 quizzes will be taken before mid-semester examination and 2 quizzes will be taken before end-semester examination. Best 2 will be counted**.**

Assignment: Problems or Case studies will be given as an assignment as a group or individual assignment during the class that they have to prepare at home will submit on or before the due date. No late submission of assignment will be accepted.

Presentation: Oral Communication and presentation skills are important components of business education. Students can improve their oral presentation skills when they know the expectations for effective presentations.

Assessment & Evaluation:

Grades will be calculated as per the university grading Structure and individual students will be evaluated based on the following criteria with respective weights.

Quizzes/Class Tests	10%
Assignments	10%
Class participation	10%
Mid-Semester Examination	30%
End-Semester Examination	40%
Total	100%

Make-up Procedures:

There will be **No MAKE-UP TESTS OR MAKE-UP QUIZ**. If you miss a Test or quiz due to serious illness of yourself or a death in your immediate family, or due to personal grounds, please contact me by explaining the reason for missing the test. You do NOT need to get a doctor's note. If Consideration is granted I will readjust the weight of assessed material.

Part D

16. Learning Materials

Recommended Readings

a. **Text Book:** Introduction to Computers; Peter Nortan
b. **Reference Books**: Computer Fundamental's; Anita Goel
   Fundamentals of Computers; P Mohan
