Surveillance Capitalism

Welcome to our Presentation

Definition

An economic system where companies collect, analyze, and sell personal data to predict and influence user behavior for profit. Also known as "The hidden trade of human experience for profit."

- The Age of Surveillance Capitalism
- Shoshana Zuboff

Surveillance Capitalism

Key concept

- Personal data as a key economic asset.
- Monitoring and predicting behavior using algorithms.
- Influencing consumer choices and decisions.
- Market dominated by a few tech giants.

Surveillance Capitalism

Impact

- **On Economy:** Privacy gone, choices controlled e.g., TikTok's addictive feed.
- **On Society:** Big tech owns ads, small businesses lose.
- **On Economy:** Algorithms fuel anger and profit from it.

What can be done

Protect Yourself: Control your data — use DuckDuckGo, Signal, turn off ad tracking, check privacy settings.

Fix the System: Support strong privacy laws (like GDPR) and fair rules to stop big tech monopolies.

Repair Society: Use ethical apps (Signal, Firefox) and demand transparent algorithms.

Data Collection

Every time we use the internet-like watching YouTube or using Facebook-companies collect our data.

Behavioral Surplus

Companies often collect more data than they need.

Machine Learning

Machine learning means teaching computers to learn from data

Surveillance Capitalism

Targeted Advertising

Finally, all this data is used for targeted advertising.

Examples and Real Word cases-

- Facebook and Instagram
- Google
- Local Examples

Surveillance Capitalism

Benefits of Surveillance Capitalism

- *Personalized Services*
- *Business Efficiency and Growth*
- *Economic Value Creation*
- *Predictive Capabilities*
- *Public Safety and Smart Governance*
- *Innovation in AI and Automation*
- *Access and Inclusion*

Surveillance capitalism is a system where companies collect ,analyze and sell personal data to predict and influence human behavior for profit.

Surveillance Capitalism

Privacy Invasion-

Your life is there data. our online actions, searches ,likes , even GPS movements are constantly tracked.

Surveillance Capitalism

Consent issues-

Most people agree to data polices without reading them.

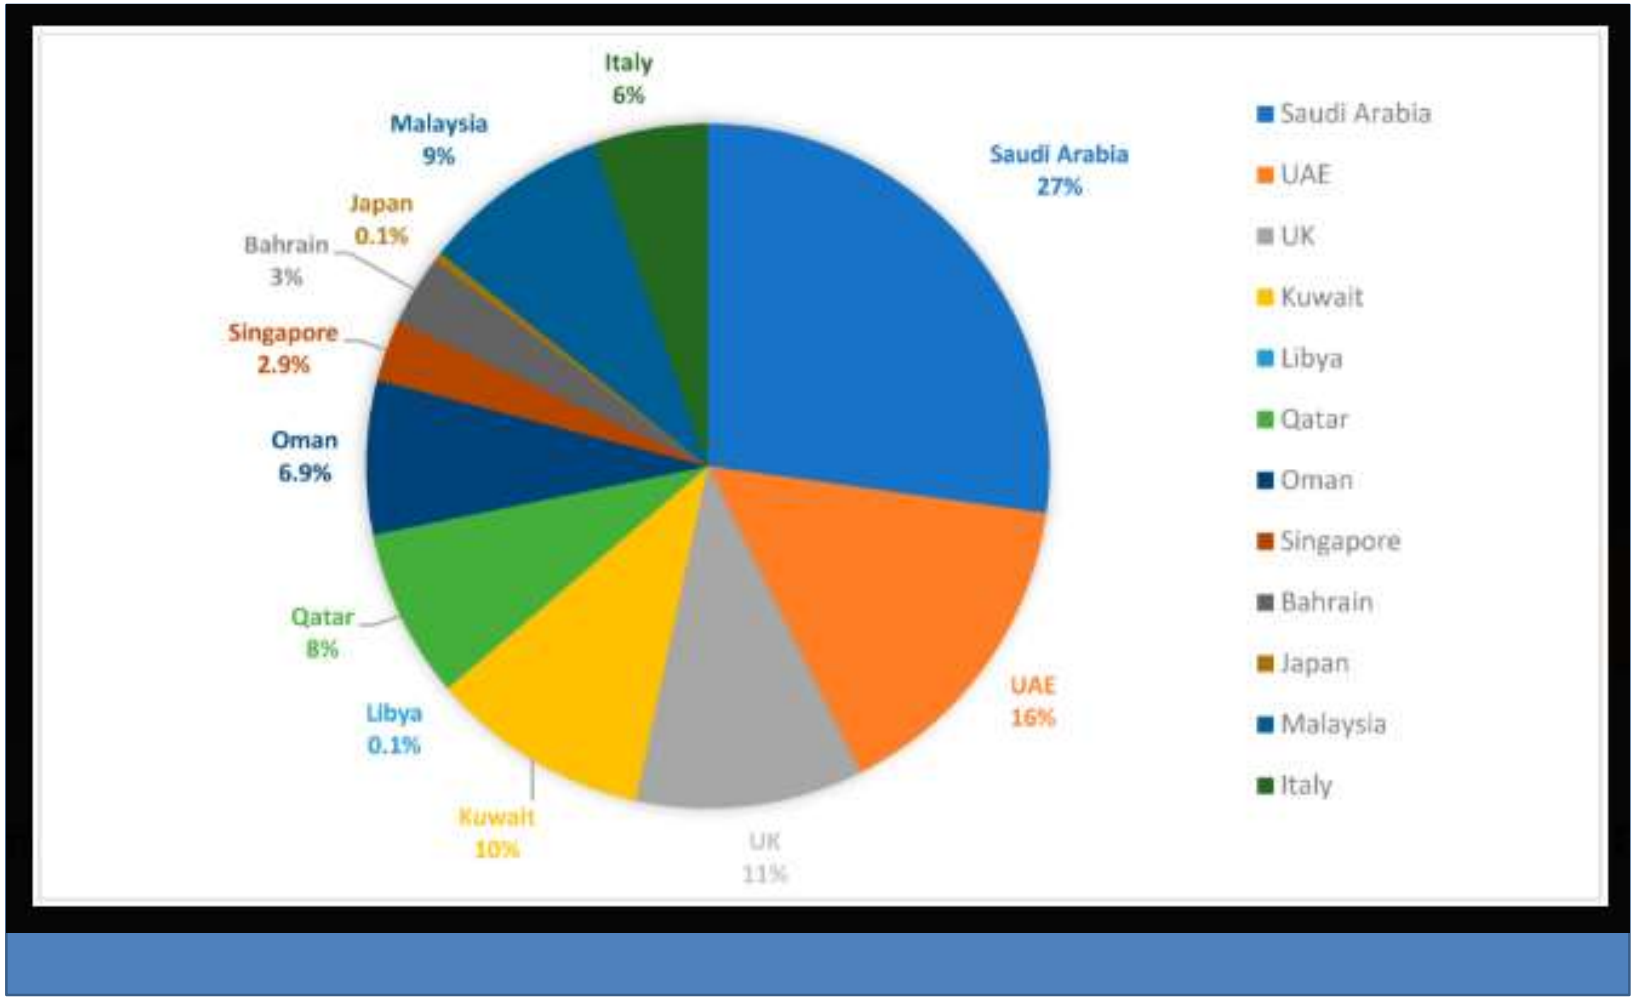
Digital Inequality-

The power gape widens those with access to data gain enormous power , while those being mined for data have non.

Surveillance Capitalism

Legal gaps-

Laws are falling behind current laws are outdated and vary by country.



Surveillance Capitalism

This pie chart illustrates the world's surveillance capitalism business.

1. Explain The Pie Chart…..
2. Marking the highest Point ?
3. Who Is The Highest Level ?

Good Side of Surveillance Capitalism

- ✓ Personalized User Experience
- ✓ Better Products and Services
- ✓ Efficient and Relevant Advertising
- ✓ Economic Growth and Innovation
- ✓ Access to Free Services
- ✓ Improved Public Services
- ✓ Fraud Detection and Security

Bad Side of Surveillance Capitalism

- × Loss of Privacy
- × Manipulation of Behavior
- × Lack of Transparency and Consent
- × Data Breaches and Cyber security Risks
- × Power Imbalance
- × Erosion of Democracy and Free Will
- × Surveillance by Governments
- × Digital Inequality

How appropriate is it for Bangladesh?

The appropriateness of surveillance capitalism in Bangladesh is a complex and evolving issue. While it brings some potential benefits (like digital innovation and targeted services), it is largely considered problematic due to weak data protection laws, lack of transparency, and risks to civil liberties

Thank you for staying with us.
